

| EXPLANATION          |   |
|----------------------|---|
| BEDDED ROCKS         |   |
| Q                    | Silt, sand, and gravel deposited by streams and lakes, and morainal material                          |
| Tv                   | Lava flows and tuffs  |
| MI                   | Limestone of Mesozoic age but possibly including some Permian limestone                               |
| Ma                   | Banded argillite, sandy argillite, sandstone, quartzite, and conglomerate                             |
| Cpl                  | Massive and thin-bedded bluish-gray limestone, in places marmorized or altered by intrusive rocks     |
| Cpv                  | Bedded volcanic rocks including altered tuffs and lava flows and undifferentiated granular intrusives |
| INTRUSIVE ROCKS      |   |
| d                    | Granular intrusive rocks dominantly diorite but including both more acidic and more basic types       |
| Gold mine            |   |
| MESOZOIC OR TERTIARY |   |
| Permian              |   |
| CARBONIFEROUS        |   |
| MESOZOIC OR TERTIARY |   |
